

## Portable Cutting Systems

Part No **4300971** (OXY/LPG)

**4300971A** (OXY ACET)

### Harris Super

This machine is innovative and with a proven history of performance and reliability.

Be aware poor Quality machines vibrate and result in a bad cut face and do not have genuine Harris torches or tips and cut speed is slower. Reliability is a real issue even after a short period of time with these poor quality copy units.

In most cases you have one man standing beside the machine, you want higher productivity, which is a benefit of the Harris product range for over 100 years.

### Features

- ✓ Straight line and circle cutting ability.
- ✓ Double cone Stepless drive system, maintaining constant travel speed even with high temperatures and allowing greater speed control.
- ✓ Modular straight "industry standard" rail sections, ordered separately. (PCSRAIL)
- ✓ Speed meter dial indication with conversion scale.
- ✓ Cutting torch unit for square or V bevel cutting.
- ✓ Torch can be easily changed between different fuel gases with Oxy/Lpg the most popular.
- ✓ Double or triple torch available on request.
- ✓ Harris accessories i.e. twin tip for stripping, bevel head, adjustable head will fit.
- ✓ Comes with hoses and valve changed to Australian colours/threads for easy change out in the future.
